FEATURED PROJECTS

PawsHome BD | Multi-Role Pet Adoption Platform *NestJS, Next.js, TypeScript, TypeORM, PostgreSQL* GitHub
- Team platform where listers post pets, admins verify and approve them, adopters adopt and vets provide care.
- NestJS REST API with JWT authentication (custom JwtAuthGuard), DTO validation, mailer and image uploads (Multer).
- PostgreSQL data model with one-to-one and one-to-many TypeORM relations; Next.js frontend.

Travel Management System *PHP (MVC), MySQL, JavaScript (AJAX)* GitHub
- Scouts submit destinations, admins approve, users browse with live AJAX search, wishlists, comments and trip-cost estimates.
- Secured with CSRF protection, prepared statements on every query and role-based login with Remember Me.

Cafe La Vien | Cafe Management System *C#, .NET Windows Forms, SQL Server* GitHub
- Desktop app with Admin (users, menu, sales) and Cashier (orders, cart, invoices) workflows, VAT billing and a shared data-access layer.

Bank Management System *Java, OOP*
- Deposits, withdrawals and inter-account transfers with a transaction history of IDs, dates, amounts, senders and receivers.

A Day in Winter: Rural Village Life *C++, OpenGL, GLUT* GitHub
- Four animated scenes (~2,000 lines) from modular OpenGL drawing functions, with timer animation and keyboard/menu control.
